---

The CSC is releasing its [Network Time Protocol](#) servers for use by all. System administrators of servers and clients in IITD can set

*ac.in*

and

*ntp2.iitd.ac.in*

as the time servers within IITD

. □

These time servers are synchronized with standard internet time servers with time drift less than a few

*milliseconds.*

Please check the documentation of your operating system for help on setting the time servers in your machine.
